EDUCATION

•**Veermata Jijabai Technological Institute (VJTI)** — *2020-24*
B.Tech in Computer Engineering — CGPA: 8.1

•**Moolji Jetha College, Jalgaon** — *2019-20*
Maharashtra State Board of Secondary and Higher Secondary Education (MSBSHSE) — Percentage: 94

•**St Joseph's Convent Senior Secondary School, Jalgaon** — *2017-18*
Central Board of Secondary Education — Percentage: 95.4

EXPERIENCE

•**Manipal Cigna Health Insurance** — *06/23 - 07/23*
Data Engineering Intern — Mumbai
- Gained a comprehensive understanding of the datalake architecture and workflow, optimizing data management processes.
- Utilized tools such as Pentaho and DBeaver to analyze and visualize data pipelines for smooth data flow.
- Analyzed SQL procedures and mapped data from various source databases to ensure accurate documentation.

•**Bajaj Finserv Ltd.** — *01/22 - 04/22*
Analyst Intern — Work From Home
- Generated custom regex expressions to extract transaction details from customer messages, automating data analysis and reducing manual effort.

PROJECTS

Instagram Clone | *Flutter, Dart, AndroidStudio, Firebase* | *Github*
- Developed a cutting-edge Flutter application mirroring Instagram's core functionalities. Users can effortlessly create accounts, share captivating photos, engage with others through likes and comments, and explore a visually enticing feed of images.
- Seamlessly integrated Firebase to provide secure user authentication, efficient database management, and reliable storage, ensuring a robust backend infrastructure for the app.

The Foodie Express | *Flutter, Dart, AndroidStudio, Firebase* | *Github*
- Crafted "The Foodie Express," a delightful food delivery app built with Flutter, offering users an easy-to-navigate interface to browse and order food.
- Implemented essential features such as menu browsing, intuitive cart management, seamless order placement, and seamless integration with Google Maps, providing users with an exceptional online food ordering experience.

Hablar - A chatting app | *Flutter, Dart, AndroidStudio, Firebase* | *Github*
- Developed "Hablar," a state-of-the-art messaging application using Flutter, delivering a seamless and intuitive communication platform for users.
- Introduced real-time messaging, robust user authentication, and versatile chat groups, ensuring secure and efficient communication between users.

Vatavaran - A live climate tracking app | *Flutter, Dart, AndroidStudio* | *Github*
- A Flutter-based application that allows user to know the climate and temperature of the place by automatically tracking user's location. Also allows user to know the live climate condition of any city that he wants

TECHNICAL SKILLS

Programming Languages: C++, Dart, SQL
Developer Tools: VS Code, Github, Android Studio
Technolgies/Frameworks: Flutter, Firebase
